MEMO

IMMEDIATE RESPONSE REQUIRED

To: George Paspalof/Howard Jones - Global Solutions
From: Patrick Hussey *PH*
Subject: McDonnell Douglas Torrance - PCB Transformers
Date: June 30, 1997

The following requires your immediate attention.

Mr. Mario Stavale of MDRC requires explanation/substantiation of the following related to the PCB Transformers from the above project site. Please contact Mario directly to confirm his requirements and handle this today. (310) 627-3014 or Mobile (714) 293-8486. Please follow-up all conversations in writing with copies of all transmittals to CST.

1. The carcasses of the PCB transformers were transported using a Bill of Lading not a hazardous waste manifest. The Environmental/Safety division of McDonnell Douglas has informed Mario that they believe the carcasses would require to be handled and transported using a hazardous waste manifest document.
2. The total quantity (gallons) of PCB oils removed and disposed from the transformers do not correctly calculate to equal the quantity that McDonnell Douglas believes was present. Please provide information to substantiate the removed and treated materials.
3. The transformer carcasses were transported to Central Reclamation for final disposition by incineration. Please provide the approved methods used for the handling, dismantling, and treatment of the carcasses, including any reports required.

Please expedite the handling of these issues. McDonnell Douglas is in the process of closing their fiscal year reporting.

Please contact me if you require my assistance in this matter.

cc: Mario Stavale, MDRC
